Past performance is not reflective of future performance. Performance shown in the Growth of \$10,000 chart represents a hypothetical investment initiated at the beginning of the time period shown. The total return of the Fund includes operating expenses that reduce returns, while the Index returns do not include expenses.

INVESTMENT STRATEGIES

The DF Dent Small Cap Growth Fund (the "Fund") invests primarily in equity securities of domestic companies that in the Adviser's view possess superior long-term growth characteristics and that have strong, sustainable earnings prospects and reasonably valued stock prices. The Fund may invest in companies that do not have particularly strong earnings histories but do have other attributes that in the Adviser's view may contribute to accelerated growth in the foreseeable future. The Fund is non-diversified, which means that it may concentrate its assets in a limited number of issuers. The Fund normally invests at least 80% of its net assets (plus borrowings for investment purposes) in equity securities of companies with small market capitalizations. The Fund considers small market capitalization companies to be those that at the time of initial purchase: (i) have a market capitalization between \$100 million and \$3.5 billion, or (ii) are within the range of the Russell 2000 Index or the S&P SmallCap 600 Index during the most recent 12 month period (which was \$22.38 million to \$5.78 billion as of June 30, 2013). The Fund typically invests in U.S. exchange-listed equity securities, consisting of common stocks, preferred stocks, real estate investment trusts, sponsored and unsponsored American Depositary Receipts and exchange-traded funds. The Fund may also invest in securities convertible into U.S. common stocks.

FUND MANAGEMENT

D.F. Dent and Company, Inc. is a registered investment adviser and has provided investment advisory and management services to clients since 1976. As of June 30, 2017, D.F. Dent and Company, Inc. had approximately \$4.12 billion in assets under management. The firm is 100% owned by its nine principals and is unaffiliated with any other investment organization. Investing involves risks, including the possible loss of principal. The Fund invests in small size companies, which carry greater risk than is customarily associated with larger, more established companies. With non-diversification risk, the Fund will typically invest in securities of fewer issuers, which exposes the Fund to greater market risk. Investing in ADRs (American Depositary Receipt) carries risks of political and financial instability, less liquidity and greater volatility, as well as risks associated with the lack of reliable accounting and financial information. The Fund is also subject to other risks, such as REIT risk with possible real estate market declines, which are detailed in the Fund's prospectus.

The Russell 2000 Growth Index measures the performance of the small-cap growth segment of the U.S. equity universe. It includes those Russell 2000 Growth Index companies with higher price-to-book ratios and higher forecasted growth values. One cannot invest directly in an index. Performance data quoted represents past performance and is no guarantee of future results. Current performance may be lower or higher than the performance data quoted. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than original cost. Historically, some of the Fund's fees were waived or expenses reimbursed; otherwise, returns would have been lower. For the most recent month-end performance, please call 866.233.3368.

Short-term performance, in particular, is not a good indication of the Fund's future performance, and an investment should not be made based solely on returns. Because of ongoing market volatility, Fund performance may be subject to substantial short-term changes.
