Investment Value

█ **DF Dent Premier Growth Fund** **\$53,635**
█ **S&P 500 Index** **\$35,069**

Past performance is not reflective of future performance. Performance shown in the Growth of \$10,000 chart represents a hypothetical investment initiated at the beginning of the time period shown. The total return of the Fund includes operating expenses that reduce returns, while the Index returns do not include expenses.

INVESTMENT STRATEGIES

The D.F. Dent Premier Growth Fund (the "Fund") invests primarily in U.S. exchange-listed equity securities, including common, preferred and convertible stock and real estate investment trusts ("REITs") that the Adviser believes possess superior long-term growth characteristics and have strong, sustainable earnings prospects and reasonably valued stock prices. The Fund may also invest in companies that do not have particularly strong earnings histories but do have other attributes that the Adviser believes may contribute to accelerated growth in the foreseeable future. The Fund primarily invests in medium and large size domestic companies. Medium size companies typically have market capitalizations in the range of \$3 billion to \$20 billion. Large companies typically have market capitalizations greater than \$20 billion.

FUND MANAGEMENT

D.F. Dent and Company, Inc. is a registered investment adviser and has provided investment advisory and management services to clients since 1976. As of June 30, 2019, D.F. Investing involves risks, including the possible loss of principal. The Fund invests in small and medium size companies. Investments in these companies, especially smaller companies, carry greater risk than is customarily associated with larger companies for various reasons such as increased volatility of earnings and prospects, narrower markets, limited financial resources and less liquid stock. The Fund will typically invest in the securities of fewer issuers. If the Fund's portfolio is over weighted in a sector, any negative development affecting that sector will have a greater impact on the Fund than a fund that is not over weighted in that sector. The Fund's adviser has contractually agreed to waive a portion of its fee and/or reimburse expenses to limit the expense ratio to 0.90% on net assets exceeding \$150 million until October 31, 2019.

The S&P 500 Index is a broad-based, unmanaged measurement of changes in stock market conditions based on the average of 500 widely held stocks. One cannot invest directly in an index. Foreside Fund Services, LLC, Distributor.

Performance data quoted represents past performance and is no guarantee of future results. Current performance may be lower or higher than the performance data quoted. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than original cost. Historically, some of the Fund's fees were waived or expenses reimbursed; otherwise, returns would have been lower. For the most recent month-end performance, please call 866.233.3368.

Short-term performance, in particular, is not a good indication of the Fund's future performance, and an investment should not be made based solely on returns. Because of ongoing market volatility, Fund performance may be subject to substantial short-term changes.
