The total return of the Fund includes operating expenses that reduce returns, while the Index returns do not include expenses.

INVESTMENT STRATEGIES

The D.F. Dent Midcap Growth Fund (the "Fund") invests primarily in U.S. exchange-listed equity securities, including common, preferred and convertible stock, real estate investment trusts ("REITs"), American Depository Receipts and exchange-traded funds that the Adviser believes possess superior long-term growth characteristics and have strong, sustainable earnings prospects and reasonably valued stock prices. The Fund may also invest in companies that do not have particularly strong earnings histories but do have other attributes that the Adviser believes may contribute to accelerated growth in the foreseeable future. Under normal market conditions, the Fund invests at least 80% of its net assets (plus borrowings for investment purposes) in equity securities of medium-size companies ("80% Policy"). For these purposes, the Fund's Adviser defines medium-sized companies as those companies with market capitalizations in the range of \$1.023 billion to \$57.7 billion, which was the three-year average of the market capitalization range of companies in the Russell Midcap Growth® Index on May 31, 2017, 2018 and 2019.

FUND MANAGEMENT

Investing involves risks, including the possible loss of principal. The Fund invests in small and medium size companies, which carry greater risk than is customarily associated with larger, more established companies. With non-diversification risk, the Fund will typically invest in securities of fewer issuers, which exposes the Fund to greater market risk. Investing in ADRs (American Depository Receipt) carries risks of political and financial instability, less liquidity and greater volatility, as well as risks associated with the lack of reliable accounting and financial information. The Fund is also subject to other risks, such as REIT risk with possible real estate market declines, which are detailed in the Fund's prospectus.

The Russell Midcap Growth Index measures the performance of the mid-cap growth segment of the U.S. equity universe. It includes those Russell Midcap Index companies with higher price-to-book ratios and higher forecasted growth values. One cannot invest directly in an index. Performance data quoted represents past performance and is no guarantee of future results. Current performance may be lower or higher than the performance data quoted. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than original cost. Historically, some of the Fund's fees were waived or expenses reimbursed; otherwise, returns would have been lower. For the most recent month-end performance, please call 866.233.3368.

Short-term performance, in particular, is not a good indication of the Fund's future performance, and an investment should not be made based solely on returns. Because of ongoing market volatility, Fund performance may be subject to substantial short-term changes.
