INVESTMENT STRATEGIES

The D.F. Dent Premier Growth Fund (the "Fund") invests primarily in U.S. exchange-listed equity securities, including common, preferred and convertible stock, real estate investment trusts ("REITs"), American Depositary Receipts ("ADRs"), and exchange-traded funds ("ETFs") that the Adviser believes possess superior long-term growth characteristics and have strong, sustainable earnings prospects and reasonably valued stock prices. The Fund may also invest in companies that do not have particularly strong earnings histories but do have other attributes that the Adviser believes may contribute to accelerated growth in the foreseeable future. The Fund may invest in companies of any size.

Investing involves risks, including the possible loss of principal. The Fund will typically invest in the securities of fewer issuers. If the Fund's portfolio is over weighted in a sector, any negative development affecting that sector will have a greater impact on the Fund than a fund that is not over weighted in that sector. The Fund is also subject to other risks, such as REIT risk with possible real estate market declines, which are detailed in the Fund's prospectus. Geopolitical and similar disruptive events, including pandemics (such as COVID-19), may destabilize various countries' economies and markets, which may experience increased volatility and reduced liquidity. Investments in small and mid-sized capitalization companies may be less liquid, and the prices of such securities may fluctuate more than those of larger, more established companies.

The S&P 500 Index is a broad-based, unmanaged measurement of changes in stock market conditions based on the average of 500 widely held stocks. One cannot invest directly in an index. Foreside Fund Services, LLC, Distributor.
