GROWTH OF A \$10,000 INVESTMENT

Investment Value

DF Dent Premier Growth Fund	\$84,450
S&P 500 Index	\$86,426

Past performance is not reflective of future performance. Performance shown in the Growth of \$10,000 chart represents a hypothetical investment initiated at the beginning of the time period shown. The total return of the Fund includes operating expenses that reduce returns, while the Index returns do not include expenses.

INVESTMENT STRATEGIES

The D.F. Dent Premier Growth Fund (the "Fund") invests primarily in U.S. exchange-listed equity securities, including common, preferred and convertible stock, real estate investment trusts ("REITs"), American Depositary Receipts ("ADRs"), and exchange-traded funds ("ETFs") that the Adviser believes possess superior long-term growth characteristics and have strong, sustainable earnings prospects and reasonably valued stock prices. The Fund may also invest in companies that do not have particularly strong earnings histories but do have other attributes that the Adviser believes may contribute to accelerated growth in the foreseeable future. The Fund may invest in companies of any size.

FUND MANAGEMENT

D.F. Dent and Company, Inc. is a registered investment adviser and has provided investment advisory and management services to clients since 1976. As of March 31, 2026, D.F. The style box reveals the fund's investment strategy. For equity holdings in the fund's portfolio, the vertical axis shows the market capitalization of the stocks owned and the horizontal axis shows the investment style.

Investing involves risks, including the possible loss of principal. The Fund will typically invest in the securities of fewer issuers. If the Fund's portfolio is over weighted in a sector, any negative development affecting that sector will have a greater impact on the Fund than a fund that is not over weighted in that sector. The Fund is also subject to other risks, such as REIT risk with possible real estate market declines, which are detailed in the Fund's prospectus. Geopolitical and similar disruptive events, including pandemics (such as COVID-19), may destabilize various countries' economies and markets, which may experience increased volatility and reduced liquidity. Investments in small and mid-sized capitalization companies may be less liquid, and the prices of such securities may fluctuate more than those of larger, more established companies.

The S&P 500 Index is a broad-based, unmanaged measurement of changes in stock market conditions based on the average of 500 widely held stocks. One cannot invest directly in an index. Foreside Fund Services, LLC, Distributor.

Before investing you should carefully consider the Fund's investment objectives, risks, charges and expenses. This and other information is in the prospectus, a copy of which may be obtained by calling 866.233.3368. Please read the prospectus carefully before you invest.
